```
> # Entering marks of 10 students
> marks <- c(78, 85, 92, 68, 74, 88, 95, 82, 76, 90)

> # Calculate mean, median, variance and standard deviation
> mean_val <- mean(marks)
> median_val <- median(marks)
> variance_val <- var(marks)
> sd_val <- sd(marks)

> # Display the results
> cat("Mean:", mean_val, "\n")
> cat("Median:", median_val, "\n")
> cat("Variance:", variance_val, "\n")
> cat("Standard Deviation:", sd_val, "\n")

Mean: 82.3

Median: 83.5

Variance: 59.78889

Standard Deviation: 7.734019
